Preface	11
Chapter 1 • The ESP32 Processor	13
1.1 Overview	13
1.2 The ESP32 architecture	14
1.2.1 The CPU	15
1.2.2 Internal memory	16
1.2.3 External memory	16
1.2.4 General purpose timers	16
1.2.5 Watchdog timers	16
1.2.6 The system clock	16
1.2.7 Real-time clock (RTC)	16
1.2.8 General purpose input-outputs (GPIOs)	16
1.2.9 Analog to digital converter (ADC)	16
1.2.10 Digital to analog converter (DAC)	17
1.2.11 Hall sensor	17
1.2.12 Built-in temperature sensor	17
1.2.13 Touch sensor	17
1.2.14 UART	17
1.2.15 I ² C interface	17
1.2.16 I ² S interface	17
1.2.17 Infrared controller	17
1.2.18 Pulse width modulation	17
1.2.19 LED PWM	18
1.2.20 Pulse counter	18
1.2.21 SPI interface	18
1.2.22 Hardware accelerators	18
1.2.23 Wi-Fi	18
1.2.24 Bluetooth	18
1.2.25 Controller area network (CAN)	18
1.2.26 SD card support	18

1.3 ESP32 development boards.	18
Chapter 2 • The ESP32 DevKitC Development Board	20
2.1 Overview	20
2.2 ESP32 DevKitC hardware	20
Chapter 3 • Using the Arduino IDE with the ESP32 DevKitC	23
3.1 Overview	23
3.2 Installing the Arduino IDE for the ESP32 DevKitC	23
Chapter 4 • Elementary Projects using The Arduino IDE and the ESP32 DevKitC .30	
4.1 Overview	30
4.2 Project 1: Alternately flashing LEDs.	30
4.3 Project 2: Binary up/down counter with LEDs	33
4.4 Project 3: Changing the brightness of an LED	37
4.5 Project 4: Thermometer with output displayed on Serial Monitor.	41
4.6 Project 5: LCD-based event counter.	45
4.7 Project 6: Generating waveforms — Sawtooth	50
4.8 Project 7: Using SD cards — Writing	54
4.9 Project 8: Using SD cards — Reading.	60
4.10 ESP32 DevKitC network programming with the Arduino IDE	62
4.10.1 Project 9: Scanning the surrounding WiFi networks.	62
4.10.2 Project 10: Controlling LEDs connected to ESP32 DevKitC from a mobile phone	64
4.11 Project 11: Bluetooth classic.	70
Chapter 5 • Sound	76
5.1 Overview	76
5.2 Audible sound waves	77
5.3 Analog and digital audio sound	78
5.4 Digital audio sound file formats	79
5.4.1 Uncompressed audio file formats	79
5.4.2 Audio files with lossy compression	79
5.4.3 Audio files with lossless compression.	80
5.4.4 Which audio file format to choose?	80
5.5 High-quality digital audio sound	81
Chapter 6 • Audio DSP Projects	82

6.1 Overview	82
6.2 The I ² S bus.	82
6.3 I ² S support of popular microcontroller development boards	85
6.4 The ESP32 DevKitC I ² S bus pins	85
6.5 Project 1: Using a digital microphone to capture audible sound.	86
6.6 Project 2: Using an amplifier and loudspeaker.	93
6.7 Project 3: Playing MP3 music stored on an SD card	102
6.8 Project 4: Playing a list of music files (playlist)	106
6.9 Project 5: Internet radio.	110
6.10 Project 6: Text to speech (TTS).	114
6.11 Project 7: Play all songs on the SD card	116
6.12 Project 8: Play all songs on the SD card — using an external volume control . . .	119
6.13 Project 9: Internet radio in stereo	120
6.14 Project 10: Internet radio in stereo with volume control	122
6.15 Project 11: Playing an MP3 file stored in the flash memory	123
6.16 Project 12: List of files stored in the flash memory	128
6.17 Project 13: Speaking event counter	130
Chapter 7 • Discrete-Time Signals	134
7.1 Overview	134
7.2 The sampling process.	134
7.3 Some digital signal types	135
7.3.1 Unit step function	135
7.3.2 Sinusoidal signal.	135
7.3.3 Exponential signal.	136
7.3.4 Exponential sinusoidal decay signal.	137
7.4 Block diagram representation	137
7.4.1 Block diagram manipulation	138
7.5 The convolution process.	139
Chapter 8 • The Z-Transform	143
8.1 Overview	143
8.2 Unit step function	143
8.3 Unit ramp function.	144

8.4 Sine function.	144
8.5 Discrete impulse function	145
8.6 The z-Transform of a function expressed as a Laplace Transform.	146
8.7 Inverse z-transforms	147
8.7.1 Coefficients of partial fraction expansion	151
Chapter 9 • Digital Filters	154
9.1 Overview	154
9.2 FIR Filters and IIR Filters	155
9.3 The Digital Filter Design Process	156
Chapter 10 • Designing FIR Digital Filters.	160
10.1 Overview	160
10.2 Truncation and windowing.	160
10.2.1 Rectangular window	161
10.2.2 Hamming window	162
10.2.3 Hanning Window.	164
10.2.4 Blackman Window.	164
10.2.4 Kaiser window	168
10.2.5 Remez Exchange-based design.	168
10.3 Using computer-aided techniques for the design of FIR filters	168
10.3.1 ScopeFIR	169
10.3.2 Dr A R Collins FIR filter design	174
10.4 FIR digital filter structures	177
10.4.1 Direct FIR structures	177
10.4.2 Cascade FIR structures	178
Chapter 11 • Design Of IIR Digital Filters	179
11.1 Overview	179
11.2 IIR filter transfer function	179
11.3 Analog filter design review	180
11.4 Butterworth filters	180
11.4.1 Bilinear transformation method	182
11.5 Chebyshev filters.	187

11.6 Elliptic filters	190
11.7 Computer-aided design tools for the design of IIR digital filters	191
11.7.1 The ScopeIIR filter design program	191
11.7.2 The Digital Filter Analyzer IIR design program	192
11.8 IIR filter structures	194
11.8.1 Direct structure	194
11.8.2 Cascade structure	194
Chapter 12 • Designing FIR Digital Filters with the ESP32 DevKitC	196
12.1 Overview	196
12.2 The PCSGU250	196
12.3 Arduino Audio Tools library	197
12.4 Project 1: Sinewave generator	198
12.5 Project 2: Signal input-output with two independent I ² S ports	202
12.6 Project 3: Signal input-output using a shared I ² S port	207
12.7 Project 4: Designing a FIR low-pass digital filter	210
12.8 Project 5: Design of a FIR band-pass filter	215
12.9 Project 6: Design of a FIR high-pass filter.	217
12.10 Design of FIR digital filters from the first principles (without using a library) . . .	218
12.10.1 ESP32 timers and timer interrupts.	219
12.10.2 Project 7: Flashing an LED using timer interrupts	222
12.10.3 Project 8: Timer interrupt-driven FIR low-pass filter program	223
12.10.4 More efficient FIR digital filter program	227
12.10.5 Project 9: An efficient FIR low-pass filter	229
Chapter 13 • Designing IIR Digital Filters with the ESP32 DevKitC	235
13.1 Overview	235
13.2 Project 1: Design of an IIR low-pass filter.	235
13.3 IIR filters of any order	238
13.4 Design of IIR filters without using a filter library	239
13.4.1 The IIR filter algorithm	239
13.4.2 Project 2: Design of IIR low-pass filter from the first principles.	239
Chapter 14 • Fast Fourier Transform (FFT)	243

14.1 Overview 243

14.2 Why FFT? 243

14.3 Project 1: FFT of an input signal 244

Appendix A 248

 Bill of Materials 248

Appendix B 249

Index 252
